PROFILE

A highly organized software engineer, specializing in PHP web applications with a comprehensive experience in web application, systems and database design, administration and development; Well versed in the concepts of object-oriented programming in a variety of languages and MVC frameworks; A very quick learner with a keen attention to details; Proven self-learning attitude coupled with a genuine love for solving problems using technology.

PROJECTS

MySQLBackup 🔗
Technologies: Bash, Curl, Linux, MySQL, S3, SMTP, SSH, ZIP

Program written in Bash (Bourne-Again Shell) that creates secure archived backups of MySQL databases and store the backups by a configured method of Secure Copy (scp), Local Copy (cp), Email (email) or Simple Storage Service (S3).

Wolfgang 🔗
Technologies: PHP

PHP MVC framework that has a built in and highly sophisticated ORM (Object Relational Mapper). The framework implements an 'Application' aspect to the conventional MVC pattern wherein it supports different interfaces (site, api, and cli) by which a user can interact with the applications that are built on it.

CONTRACT / PHP WEB DEVELOPER (*Oct 2015 – Jan 2019*)

STRENGTHS

Problem Solving
Solved complex bugs and implemented highly technical changes

Collaboration
Worked closely with cross-functional teams to deliver projects in a timely manner

SKILLS

AJAX	AWS
AngularJs	MinIO
Apache	Ant
S3	PHP
Zend Framework	SEO
Bootstrap	CSS3
Centos	PHPUnit
Jira	Docker
Eclipse	RabbitMQ
Git	Graylog
HAProxy	HTML5
CakePHP	JQuery
PostgreSQL	Java
Postfix	JavaScript
Jenkins	Wordpress
REST	Dovecot
LAMP	Linux
Memcached	Bash
MySQL	NPM
Nagios	NodeJs
Ubuntu	React
Smarty	Twig
phpMyAdmin	

TannerRitchie Publishing, Burlington ON

- Investigating and debugging issues within source code for various client applications
- Writing cross-browser compliant front-end code
- Refractoring legacy code in increasing efficiency, reducing code and increasing the performance of legacy software
- Developing a custom Wordpress plugin
- Developing and maintaining Wordpress applications
- Designing and constructing database architecture, developing and maintaining white-label application (MEMSO)
- Migrating websites to Wordpress content management system

CONTRACT WEB DEVELOPER (*Jun 2015 – Oct 2015*)

Alt Media, Pickering ON

- Designing database architecture in supporting online business directory platform from the ground up
- Converting wire-frame mock-ups to front-end and back-end application code
